Choose a classic template

Classic templates have all the power and functionality you expect. They're created and managed centrally by a Jira admin using schemes.

Search All types Import your work

Kanban

Monitor work in a continuous flow for agile teams. Suits teams who control work volume from a backlog.

What's in this? [Select](#)

Scrum

Manage stories, tasks, and workflows for a scrum team. For teams that deliver work on a regular schedule.

What's in this? [Select](#)

Bug tracking

Manage a list of development tasks and bugs. Great for teams who don't need a board.

What's in this? [Select](#)

Project Management

Manage activities for completing a business project. Use it for time-based or deliverable-based projects.

What's in this? [Select](#)

Task tracking

Organize tasks for a team or a personal project. Treat it like a long to-do list.

What's in this? [Select](#)

Process control

Track activities and tasks for recurring processes. Suitable for processes that have defined steps.

What's in this? [Select](#)

Groups

Manage product access and roles in bulk by adding users to groups that have the required permissions. For example, add users to the default 'administrators' group so they are able to delete Jira issues. [Learn more](#)

SP: Project Management Issue Type Scheme

Actions

Keep track of different types of issues, such as bugs or tasks. Each issue type can be configured differently.

The issue type scheme defines which issue types apply to this project. To change the issue types used, you can select a different issue type scheme, or modify the currently selected scheme.

Issue Type	Description	Workflow	Field configuration	Screen
<input checked="" type="checkbox"/> Task	A task that needs to be done.	SP: Project Management Workflow	Default Field Configuration	SP: Project Management Screen Scheme
<input checked="" type="checkbox"/> Sub-task SUB-TASK	The sub-task of the issue	SP: Project Management Workflow	Default Field Configuration	SP: Project Management Screen Scheme
